

MATCH 'EM UP

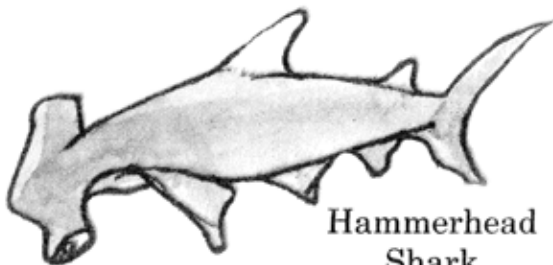

Many more creatures live in the offshore waters such as the leatherback turtle, black sea bass, red snapper, hammerhead shark and the sheepshead. Learn about who lives in Georgia's offshore waters. See if you can match the picture of the sea creature and its description. Draw a line from the drawing to the correct description.

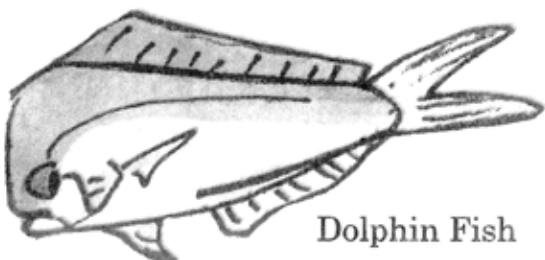

Loggerhead
Turtle

Right Whale

Hammerhead
Shark

Dolphin Fish

1. Very large species with many sharp teeth. Skin feels like sandpaper.

2. Brilliant shiny colors of yellow, blue and green. A great catch for offshore fishermen.

3. Deposits eggs in the sands of warm beaches. Found in Georgia waters in early spring, summer and fall.

4. One of the largest creatures on earth. Migrates to Georgia and Florida waters in winter. Among the most endangered on the planet.
